## BLACK BAY GMT S&G

**The iconic Black Bay GMT model with integrated *Manufacture* Calibre GMT is now also available in a S&G (Steel & Gold) version, featuring warm colours and a nostalgic touch.**

Black Bay GMT S&G is a model with multiple time zones, a highly functional complication that establishes local time without losing sight of the time in two other time zones. Recognisable by its 24-hour graduated rotating bezel with two colours, representing day and night, the Black Bay GMT S&G also gives a subtle aesthetic nod to the history of this watchmaking function.

**Domed grained**  
matt black dial

**“Snowflake” hands,**  
a hallmark of TUDOR divers’  
watches since 1969, with  
Grade A Swiss Super-LumiNova®  
luminescent material

**Manufacture Calibre MT5652,**  
COSC-certified with a silicon balance  
spring, 70-hour power reserve

**Satin-brushed and polished case**

in 316L stainless steel and yellow gold, 41 mm  
in diameter, with a bidirectional rotating bezel  
in yellow gold and insert in black and brown  
anodised aluminium as a hallmark of the GMT  
function

**A choice of three bracelet**

**designs:** black Jacquard fabric,  
aged brown leather or riveted  
316L steel and yellow gold

Five-year transferable guarantee with no requirement for registration or periodic maintenance checks

## THREE TIME ZONES

On the Black Bay GMT S&G model, the reference time is indicated by an angular “Snowflake” hand, an aesthetic hallmark of TUDOR, which completes a lap of the dial every 24 hours. Local time is indicated by another, shorter “Snowflake” hand set by a jumping hour, which can be moved either backwards or forwards. The date, displayed through an aperture positioned at 3 o’clock, is connected to the local time hand so that when setting the time and passing midnight in retrograde, it instantly jumps to the previous day. A very practical and technical detail for the user. The 24-hour graduated bidirectional rotating bezel and “24-hour” hand mean you can also keep track of a third time zone. On the anodised aluminium disc of the bezel, the graduations for the twelve daylight hours are gold-coloured on the brown section with the night-time hours on the black section.

# THE *MANUFACTURE* CALIBRE MT5652

The *Manufacture* Calibre MT5652 with built-in GMT function was developed by TUDOR for the Black Bay GMT S&G model. It illustrates the technical development process which is unique to TUDOR, drawing on adaptable architecture capable of including new functions into its manufactured movements rather than resorting to additional modules. A minor detail for some, but a must for watchmaking purists.

It has been designed to ensure robustness, longevity, reliability and precision, as has its variable inertia balance, which is maintained by a sturdy traversing bridge with a two-point fixation. Together with its non-magnetic silicon balance spring, the *Manufacture* Calibre MT5652 is certified as a chronometer by the Official Swiss Chronometer Testing Institute (COSC), with its performance going beyond the standards set by this independent institute. In fact, where COSC allows an average variation in the daily running of a watch of between -4 and +6 seconds in relation to absolute time in a single movement, TUDOR insists on between -2 and +4 seconds' variation in its running when it is completely assembled.

Another notable feature is that the power reserve of the *Manufacture* Calibre MT5652 is «weekend-proof», about 70 hours, which enables the wearer to take the watch off on a Friday evening and put it back on again on Monday morning without having to reset it.

## STEEL AND GOLD BRACELET, OR JACQUARD- WOVEN OR LEATHER STRAP

The fabric strap is one of the hallmarks of TUDOR, which, in 2010, became one of the first watchmaking brands to offer it with its products. Woven in France using a traditional method on 19th century Jacquard looms by the Julien Faure company in the St-Etienne region, its manufacturing quality and comfort on the wrist are unique. In 2020, TUDOR celebrated ten years of collaboration with the hundred-and-fifty-year-old Julien Faure company. The partnership began with the launch of Heritage Chrono, the first model fitted with a fabric strap created by the craftsmen, at Baselworld 2010.

For the Black Bay GMT S&G, TUDOR has selected a black strap with a beige band woven by these traditional craftsmen. The model is also available fitted with a stainless steel and yellow gold bracelet inspired by the folding riveted bracelets made by TUDOR in the 1950s and 1960s. These were famous for having visible rivet heads on the side of the bracelet that held the links together. The links also had a distinct stepped construction. These two aesthetic details are found on the current bracelet, which also integrates modern manufacturing methods with solid links and laser-finished rivet-style heads. Finally, the Black Bay GMT offers another choice of brown leather strap with light top-stitching and a folding clasp.

## THE ESSENCE OF BLACK BAY

The Black Bay line features dials inspired by the TUDOR divers' watches produced during the 1950s. It borrows the characteristic angular hands known to collectors as "Snowflake" from models that appeared in the brand's 1969 catalogue. Its unprotected crown and the characteristics of its case are reminiscent of the first generations of TUDOR divers' watches.

The Black Bay line is the result of the subtle blend of traditional aesthetics and contemporary watchmaking. Far from simply being an identical re-release of a classic, it brings together over sixty years of TUDOR divers' watches at the same time as being resolutely anchored in the present. Whilst it is neo-vintage in conception, its manufacturing techniques, reliability, robustness and the quality of its finish are consistent with today's more rigorous requirements.

## THE TUDOR GUARANTEE

Since the brand's creation by Hans Wilsdorf in 1926 and in line with his vision of the ideal timepiece, TUDOR has been ceaselessly creating watches that are as robust, durable, reliable and precise as possible. On the strength of this experience, and confident in the superior quality of its watches, TUDOR offers a five-year guarantee for all its products. This guarantee does not require the watch to be registered or submitted to periodic checks and is transferable.

## ABOUT TUDOR

TUDOR is an award-winning Swiss-made watch brand, offering mechanical watches with sophisticated style, proven reliability and unmatched value for money. The origins of TUDOR date back to 1926, when "The Tudor" was first registered as a brand on behalf of the founder of Rolex, Hans Wilsdorf. He officially set up the Montres TUDOR SA company in 1946 to produce watches that respect the traditional Rolex philosophy of quality at a more affordable price point. Because of their robustness and affordability, throughout their history TUDOR watches have been chosen by the boldest adventurers on land, in the air, underwater and on ice. Today the TUDOR collection includes emblematic models such as Black Bay, Pelagos, 1926 and Royal. Since 2015, TUDOR has also offered models with mechanical *Manufacture* Calibres with multiple functions and superior performance.

## BLACK BAY GMT S&G

REFERENCE 79833MN

### CASE

41 mm steel case with polished and satin finish

### BEZEL

48-notch bidirectional rotating bezel in yellow gold with 24-hours graduated matt brown/black anodised aluminium disc

### WINDING CROWN

Yellow gold screw-down crown, with the TUDOR rose in relief, with circular satin-brushed steel winding crown tube

### DIAL

Black, domed

### CRYSTAL

Domed sapphire crystal

### WATERPROOFNESS

Waterproof to 200 m (660 ft)

### BRACELET

Riveted steel and yellow gold bracelet with polished and satin finish, or brown leather strap with steel folding clasp and safety catch, or black fabric strap with beige band and buckle

## MOVEMENT

### CALIBRE

Manufacture Calibre MT5652

Self-winding mechanical movement with bidirectional rotor system

Integrated construction

### PRECISION

Swiss Chronometer officially certified by the COSC (Swiss Official Chronometer Testing Institute)

### FUNCTIONS

Jumping hours (second time zone), 24 hours, minutes and seconds at the centre

Instantaneous date at 3 o'clock without non-correction range synchronised on the jumping hours hand

Stop-seconds for precise time setting

### OSCILLATOR

Variable inertia balance, micro-adjustment screw

Non-magnetic silicon balance spring

Frequency: 28,800 beats/hour (4 Hz)

### TOTAL DIAMETER

31.8 mm

### THICKNESS

7.52 mm

### JEWELS

28 jewels

### POWER RESERVE

Power reserve of approximately 70 hours
