

TUDOR CLAIR DE ROSE

TUDOR revisits the feminine Clair de Rose line in a refined and timeless manner. Available exclusively in steel with mechanical movements, the new models come in three sizes and six designs.

The Clair de Rose line has been re-imagined for 2017. In a classic, refined and timeless spirit, it uses the brand's historic aesthetic codes without straying from the gentle curves of its middle case and its striking winding crown, which on this model is set with a blue spinel cabochon. Available in three sizes, 26, 30 and 34 millimetres in diameter, it presents opaline dials with delicate decorations in relief, punctuated with blue lacquered Roman numerals or diamonds. Clair de Rose is fitted with a self-winding movement complete with date function and is available exclusively in steel.

THE SPIRIT OF CLAIR DE ROSE

This feminine watch has a long history at TUDOR and presents a style that is at the same time delicate and bold. The new Clair de Rose draws freely from this heritage, making aesthetic reference to lines with evocative names such as Princess, Glamour and Miss TUDOR. It was from the latter collection that one of the most recognisable Clair de Rose elements was taken: the winding crown adorned with a precious spinel cabochon.

THREE BRACELET DESIGN

Every size in the line comes with a choice of three bracelets: steel with small “rice grain” links for unrivalled suppleness and shine, black alligator leather for timeless elegance, or fabric adopting the Clair de Rose line’s signature curl for an artistic touch. This bracelet, produced using the traditional Jacquard technique by a 150-year-old family firm from the region of Saint-Étienne in France, is uniquely comfortable and filled with character.

ABOUT TUDOR

TUDOR is a Swiss watchmaking brand that offers mechanical watches with sophisticated style, proven reliability and an unparalleled relationship between quality and price. The origins of TUDOR date back to 1926, when «The Tudor» was first registered as a brand on behalf of Hans Wilsdorf, founder of Rolex. In 1946, he founded the Montres Tudor SA company to produce watches that respect the traditional Rolex philosophy of quality at a more accessible price point. Throughout their history, TUDOR watches have been chosen by the boldest adventurers on land, underwater and on ice, the world over. Today, the TUDOR collection includes emblematic models such as Black Bay, Pelagos and Style and since 2015 it has offered mechanical *manufacture* movements.
